SUMMARY

Backend Engineer with 1.5 years of experience architecting high-availability systems. Specialized in Spring Boot & Node.js. Demonstrated success in reducing average API latency by 35% and automating complex data pipelines to recover over 1,000 annual operational hours. Proven expertise in migrating monolithic structures to scalable microservices to support high-growth engineering goals.

EXPERIENCE

CodeBee Lab Pvt Ltd | *Web Developer*

Sep 2024 – Oct 2025

- Optimized SQL Server indexing and complex JOIN logic for a high-volume financial module, reducing average API response latency by 35% (from 400ms to 260ms) for 50,000+ active users.
- Orchestrated technical discussions within a 6-member Agile team to synchronize backend-to-frontend, increasing sprint delivery efficiency by 15% and reducing integration defects.
- Engineered robust RESTful services using Spring Boot 3, implementing Spring Security and JWT for Role-Based Access Control (RBAC) to ensure 100% data integrity across sensitive endpoints.
- Automated legacy Excel data ingestion processes using Java-based scripts, eliminating 20+ manual staff hours weekly and improving data accuracy by 98%.

Dvertex Info System | *Web Developer Intern*

Feb 2024 – Aug 2024

- Constructed high-performance CRUD APIs using Node.js and Express, implementing strict schema validation that decreased integration-related production defects by 25%.
- Reconfigured SQL Joins to handle complex data relationships, accelerating data retrieval speeds by 22% for the core analytical reporting dashboard.
- Collaborated on the design of a responsive frontend interface using React.js, achieving a 95+ Lighthouse performance score for mobile-first user experiences.
- Facilitated cross-functional code reviews, identifying 30+ potential security vulnerabilities before production deployment and ensuring adherence to Clean Code principles.

SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Node.js, Express.js

Frontend: HTML, CSS, JavaScript, React.js

Databases: MySQL, SQL Server

Tools: Git, Postman, Eclipse, VS Code, IntelliJ IDEA

PROJECTS

Mental Health Support Application (In Progress) | Tech Stack: *Spring Boot, React.js, SQL*

- Architected modular REST APIs using Spring Boot and layered architecture patterns to track user behavioral logs, boosting system responsiveness by 24% for real-time mood tracking.
- Fortified data privacy by implementing JWT authentication and Role-Based Access Control (RBAC), ensuring 100% secure handling of sensitive health records and user activity logs.
- Optimized relational SQL schemas for complex behavioral data, resulting in a 25% reduction in query latency during peak user activity simulations.

Banking System (Demo) | Group Project | Tech stack: *React.js, REST APIs, SQL*

- Revitalized backend services for real-time transaction processing using React.js and RESTful APIs, successfully managing 500+ simultaneous simulated account operations.
- Validated data consistency by applying strict schema constraints and transactional logic, achieving zero integrity errors across all simulated financial workflows.
- Streamlined account management modules to handle high-efficiency retrieval of transaction history, improving frontend dashboard responsiveness by 15%.

EDUCATION

Maharishi Dayanand University

Master of Computer Applications

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming in Java.

Haryana

Jul 2021 – Jul 2023

Maharishi Dayanand University

Bachelor of Computer Applications

Relevant Coursework: Professional Ethics in IT, Software Engineering Principles, Database Management System

Haryana

Jul 2017 – Jul 2020
